Soft skills:

Teamwork, collaborative, commitment, resilience, entrepreneurship, constant learning, self-improvement

Professional summary

Full Stack Developer

Full stack application developer with NodeJS, TypeScript, GraphQL, React and React-Native (2021 - present)

- Designed and developed a mobile application project with React-Native and SQLite for offline support.
- Designed, developed and performed backend testing with GraphQL, TypeORM, Type-Graphql, Fastify, Mercurius and Jest.
- Developed and implemented an Open ID Connect server with OIDC Provider to handle the connection of mobile, web and third party clients to the GraphQL API.
- I deployed with PM2 on Heztner VPS servers via command line in different environments.

University Professor

Universidad de Oriente (2014 - 2017)

- I worked as a professor at the Universidad de Oriente Núcleo Sucre, Carúpano extension, in the subjects of Algorithms and Data Structure I and II, and Multimedia.

Web developer

Freelancer (2008 - 2018)

- Implemented systems with PHP and MySQL and adapted pre-existing systems with new functionalities to meet customer requirements.
- Launched and put into production Fondos12.com and Humor12.com with new design and functionalities according to current web technology.
- Performed SEO optimization for the websites in order to position them in search engines with phrases related to their niche.
